

FOR VETERINARY APPLICATIONS

Contain The Liquid. Simplify The Cleanup.

Pre-measured, water soluble packs help veterinary teams turn free-flowing liquid medical waste into a more manageable solid.

Multiple sizes available for different collection volumes for each type of procedure

Why ZapPak ?

Each pre-measured pack is made with water-soluble PVA film and contains super-absorbent polymer formulated to solidify liquid medical waste up to the indicated dose size.

- ✓ Pre-measured for quick, convenient use
- ✓ Water-soluble film eliminates the need to open the pack
- ✓ Reduce splashing and free-flowing liquid making a safer experience for the surgery team
- ✓ Makes liquid waste easier to handle and dispose of
- ✓ Multiple sizes for different collection volumes

Small Procedure Packs

Precision System for low-volume applications

Target Procedures
