# HumiSeal® 1B73 Aerosol Conformal Coating Technical Data Sheet

HumiSeal® 1B73 Aerosol is a fast drying, clear acrylic conformal coating, intended for use on printed circuit assemblies. The product is conveniently dispensed from aerosol cans utilizing an environmentally safe, non-ODP propellant, and contains UV tracer for inspection under black light. The coating may be removed chemically using HumiSeal® Stripper 1080 or 1080A. HumiSeal® 1B73 Aerosol is IPC-CC-830 and RoHS Directive 2011/65/EU compliant.

# Properties of HumiSeal® 1B73 Aerosol

Density, per ASTM D1475

Solids Content, % by weight per Fed-Std-141, Meth. 4044

VOC

Drying Time to Handle per Fed-Std-141, Meth. 4061

Recommended Coating Thickness Recommended Curing Conditions

Time Required to Reach Optimum Properties

Recommended Stripper

Shelf Life at Room Temperature, DOM Thermal Shock, 50 cycles per MIL-I-46058C Coefficient of Thermal Expansion - TMA Glass Transition Temperature - DSC

Modulus - DMA

Dielectric Withstand Voltage, per MIL-I-46058C Dielectric Breakdown Voltage, per ASTM D149

Dielectric Constant, at 1MHz and 25°C, per ASTM D150-98 Dissipation Factor, at 1MHz and 25°C, per ASTM D150-98

Insulation Resistance, per MIL-I-46058C

Moisture Insulation Resistance, per MIL-I-46058C

Fungus Resistance, per ASTM G21

# Application of HumiSeal® 1B73 Aerosol

- 1. Allow 48 hours minimum to reach room temperature before using cans stored or received during cold weather.
- 2. When applied in conditions of high ambient humidity, blushing (cloudy white film) may appear. Heating the coated assembly in an oven for 1/2 hour at 76°C eliminates this condition.
- 3. Surface must be cleaned of dirt, wax, grease, flux residues and all similar contaminants for successful application of coating.
- 4. Mask areas not requiring coating from overspray, using suitable non-silicone masking methods or materials.
- 5. Shake can vigorously before using and repeat frequently during use.
- 6. Best results are obtained by spraying from a distance of 30 40cm in light even coats. A film thickness of 25 75 microns is sufficient to provide protection.

7. To clean nozzle after use, hold can upside down, then press nozzle for a few seconds.

#### Caution

Application of HumiSeal® Conformal Coatings should be carried out in accordance with local and National Health and Safety regulations.

The solvents in HumiSeal<sup>®</sup> Conformal Coatings are flammable. Material should not be used in presence of open flame or sparks. Use only in well-ventilated areas to avoid inhalation of vapours or spray. Avoid contact with skin and eyes.

Consult SDS prior to use.
